### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 9, 10, 12-17, 22 and 39-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukuo et al, U. S. Patent 6,203,910.

Reference to Fukuo et al teaches claimed compositions as mentioned in the previous actions. Applicants' arguments have been considered but are not found persuasive. The reference specifically teaches the use of dipropylene glycol monomethyl ether in combination with propylene glycol monomethyl ether in example 4. Replacing the disclosed propylene glycol monomethyl ether with propylene glycol monobutyl ether would give the combination claimed by Applicants. These are solvents that are mere homologues of each other and are, therefore, prima facie obvious from that teaching. The reference itself suggests substitutions of monobutyl ether for monomethyl ether by equating the two in comparative example 1 and 2. Substitution of claimed propylene glycol monobutyl ether for the disclosed propylene glycol monomethyl ether would, therefore, be prima facie obvious absent evidence of unexpected results commensurate in scope to the claims.
